DETAILED ACTION

This office action is in response to Application 10/579,505 filed 10/27/06.

Claims 1-41 are pending with claim 1 in independent form.

Priority

This Application is a 371 National Stage Application of PCT/EP05/10497 filed 9/28/05, which claims priority to Foreign Applications EPO 04077912.6 filed 10/22/04 and JP 2005-098062 filed 3/30/05. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

1. Claims 1-41 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art teaches a foldable RFID tag that has an adhesive for attachment to an object where the tag also has a foldable part that also forms a printable part. (See Hugh et al. US 6,278,413 B1). This is different from Applicant's claimed invention in that the prior art (Hugh et al.) does not arrange the RFID between the printable stroke part and the holding part that holds the RFID. The prior art of record fails to teach or fairly suggest to one of ordinary skill in the art, in conjunction with all the other limitations of the claims:

With respect to claim 1 and all its dependencies:

- A label having at least one pasting part with an adhesive agent and comprising a holding part to hold an electronic device for a radio frequency identification where the pasting part is foldable with respect to the holding part to allow the holding part to protrude from the object when the pasting part is pasted to the object and a stroke part foldable with respect to the holding part where the RFID is arranged between the stroke part and the holding part

The prior art of record fails to provide sufficient teaching or motivation to one of ordinary skill in the art to provide the additionally recited features of these claims in the combinations as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Qiu et al. US 6,373,387 B1 teaches a foldable RF label. Johnson US 2007/0034692 A1 teaches a foldable RF tag where the antenna extends away from an attachment base. Beilenhoff et al. US 2006/0113397 A1 teaches a bendable adhesive RF tag. Ito US 2006/0092027 A1 teaches a rotatable RF tag. Appalucci et al. US 2006/0086808 A1 teaches an RF tag

Art Unit: 2876

holding portion to hold the tag spaced away from a metallic container. Laurash et al. US 6,836,215 B1 teaches an RF identification band with a folding portion to cover the RFID chip. Kolton et al. US 6,724,311 B1 teaches a foldable EAS hang tag. Wurz et al. US 5,838,253 teaches an adhesive RFID label.
